6. Ties will be broken by the time of accumulation of points. In the case of tie weights, the fish weighed in first is the winner.

D. RELEASING:

1. To qualify and receive Year End Tournament Points, released Billfish and Mako Sharks must be photographed in accordance with the following rules:
 - a. Photographing and Releasing Fish: To qualify as a "Released" fish, a digital photograph(s) or video of the fish must be submitted within 72 hours of the catch via the official club website (www.NEFMA.com). The photo may be taken with a personal camera or phone.
 - b. The photo/video must allow the Tournament Director or Board of Directors to identify the species of the fish and to determine that the fish is "under control" of the crew. "Under Control" means that the crew has leader in hand, the fish is close enough to the boat and is in a position that a tag could be used if desired.
2. General Releasing Rules:
 - a. The fish must be intentionally released. The recommended method is to remove the hook. If your hook cannot be easily and safely removed, the alternative method is to cut the leader as close to the hook as possible. If the leader breaks or the fish gets off the hook while in control of the leader the fish qualifies as a release. The key word is "intent". If your intent is to release the fish, then the fish will count. If your intent is to boat the fish, and the fish gets off then the fish does not count.
 - b. The fish may not be removed from the water in its entirety at any time. The head of the fish may be lifted to facilitate its release. The less time the fish spends alongside the boat the greater the chance for survival. Fish that are weak should be revived along side with the dorsal fin in a vertical position. This procedure may take several minutes but may make the difference between death and survival. If the fish cannot be revived, the fish may be released and points will still be awarded.
 - c. If a billfish, of legal size, that has been previously tagged is recaptured, it may (should) be brought in and will be awarded points for a tag and release. This does not preclude a fish from being weighed as a board fish.

E. RECORDING:

1. Each Captain or designated associate member is responsible for weighing and certifying the boat's catch. All fish caught must be weighed on board approved certified scales unless otherwise stated . Entries must be submitted on the official web-site (www.nefma.com). All catches must be submitted within 72 hours of the time of release or weigh-in.
2. By doing so, the Captain is certifying that all criteria in these rules have been met. Also, in the case of a release, it is the opinion of the Captain, the fish was released in a condition that afforded the fish a reasonable chance of survival.
3. In tournaments, Captains should enter all their fish which are above the minimum weights, even though they think their fish is not the largest. This information will help in our yearly catch records which will improve fishing for all.
4. In order to receive Boat of the Year or TSC points, a picture or video of the fish must be submitted. Pictures are required for both Billfish and Gamefish.
5. All General & Associate Members are required to submit their catches through the club's website by first logging in, then mousing over "Catches" in the navigation of the website, and then selecting "Submit Catch."
